RE: City of Fonda – Energy Efficiency Certification

Mr Jones,

P&E Engineering has been retained by the City of Fonda to evaluate the City's electrical distribution system and to explore options to convert the system from overhead to underground.

This project is of such a nature that the current state building energy codes do not apply. I am also not aware of any Energy Star products that qualify.

The project will use transformers that meet the Department of Energy rules on transformer efficiency. Any streetlights purchased will also comply with all state efficiency requirements.

Please let me know if you have any questions.

Sincerely,

Allan Powers, P.E.
